WHAT TO DO WHEN THE ELECTRICITY GOES OUT

Before Calling:

1. First check to make sure you have not blown a circuit breaker or fuse. Check the circuit breaker or fuses in your home's electricity panel.
2. Check to see if your nearest neighbor has electricity. If they do, and you are on the same transformer, it is most likely that you have blown a fuse or tripped a breaker. When several members are on one transformer, they should have electricity at the same time.

If the above does not restore your electric service
call your nearest SLECA office.
